

# License Dashboard SAM Insights

**Gain actionable insights into your IT network with our range of software asset management (SAM) projects and reviews from leading software licensing specialists.**

License Dashboard SAM Insights provides a range of consultancy and project-based services to organizations who understand the power of their data and want to unlock the value of their IT investments. The service supports your organization to uncover cost savings, prevent license compliance risk, assist with software vendor challenges, and report on IT infrastructure.

**Optimize your IT spend, reduce risk, and accelerate your business goals**

Services available with SAM Insights include enhanced Effective License Positions for vendors, sub-sets of product deployments, software optimization reviews, and cloud productivity assessments.

Our team of software licensing specialists provide vendor specific consultancy on topics from cost optimization to renewal and contract negotiation management, and audit defence.

## Features and benefits >>>

Fast, actionable insights into your IT network

Wide range of services from cloud transition to software optimization

Reduce IT spend and accelerate digital transformation

No long-term commitment

Services delivered directly to digital stakeholders within your business

## Available SAM Insights

### AWS optimization

Save a minimum of 10% on your next bill with our AWS Cost Optimization service.

### Cloud productivity

End-to-end analysis of your IT infrastructure, covering your current deployment, usage, processes, and licensing data with recommendations on your cloud ready capabilities and cloud migration strategy.

### Contract assessment

Contract Assessment is an advanced service that combines optimized reconciliation output with known future changes to add context to current and previous contract reviews.

### Cyber security

A foundational analysis of your cyber security infrastructure covering current software deployment, usage, and licensing data.

### Enhanced ELP

A vendor or product specific report produced to identify and reduce risk.

The commentary and observations enhance your ability to manage your license footprint more effectively, providing fully documented analysis of license shortfalls or surplus.

### Entitlements update

Establish your deployment rights based on available contract details and procurement data. These deployment rights are organic and vary from day to day.

### IT asset control

Empowers you to gain better control over the applications and hardware entering your IT environment and streamline the process to maximise the value extracted from existing software licenses.

### Licensing support

Proactive management and procurement advice for Microsoft licensing that allows you to request detailed advice and reports based on modelling and potential scenarios.

### Lifecycle management

Helps you to identify the key stages in the lifecycle of your hardware and software assets to minimize and mitigate the potential risks of moving assets from one life cycle stage to the next.

### Microsoft software optimization

Fully understand your license entitlements, make recommendations, and identify implementation and cost modelling to provide definitive long-term costs. This service gives you a detailed three-to-seven-year plan of action for future licensing requirements.

### Optimized reconciliation

Delivers a non-compliance position based on existing entitlement and current deployments. The optimization ensures that current entitlements are better utilized to offer the best possible cost avoidance and savings.

### Software control assessment

Reviews and improves internal processes, routines, and data used in the management of software installations and licensing. The service provides assurance of your organization's audit readiness for vendor or product sets and gives recommendations on areas requiring improvement.

### Software recognition service

Provides you with a single version of the truth for what is installed across your entire IT estate.

### License Manager

License Manager is a powerful yet easy-to-use platform, which enables you to accurately manage your software licenses.

### License Dashboard Portal

Enables you to share SAM and software usage monitoring information with key stakeholders outside of your SAM team in an easy-to-understand BI format.
