

# License Dashboard SaaS Manager

License Dashboard's SaaS Manager simplifies and improves the process of tracking, managing, and optimizing SaaS spend and Cloud costs.

Successfully control your Software as a Service (SaaS) subscription costs by optimizing your employees' SaaS usage, discovering SaaS underutilization, and detecting shadow IT with SaaS Manager.

## Features and benefits ▶▶▶

- ▶ Manage and optimize your SaaS spend
- ▶ Eliminate unexpected costs and cloud platforms
- ▶ Manage your organization's SaaS subscriptions in one place
- ▶ Receive intelligent recommendations and cost saving tips on SaaS licenses
- ▶ Integrate with all major SaaS and cloud applications
- ▶ View all upcoming SaaS renewal dates
- ▶ Understand your AWS and Azure IaaS utilization

## Technical specifications

SaaS Manager identifies SaaS applications used in your organization and provides detailed insights, recommendations, and statistics, empowering you to:

- Make more informed decisions on your SaaS license options
- Identify underutilized, idle, and abandoned licenses
- Optimize your spend by comparing actual usage to available licenses and converting unused and underutilized applications into savings

By providing ongoing scanning of SaaS applications, cost-saving recommendations are presented based on individual user activity within applications, such as Office 365.

## Track and manage SaaS Renewal Dates

Keep control of your SaaS and Cloud spend by tracking and monitoring your SaaS billing in one place.

Empower better budgeting, forecasting, and procurement decisions with access to the SaaS spend and financial data you need. See payment plans and billing periods at-a-glance for all products and compare with utilization statistics to ensure your organization only renews what is necessary.
